Walking With Your Westie

Sue Peters, Education Committee

Dogs need exercise, and so do you! Taking your dog for a walk can be beneficial for both of you. Studies have shown that dog walking trims the waistline for both you and the dog. And we all know an overweight person/dog is not a healthy person/dog

Dog walking gives the owner a sense of purpose. In return, regular walks give the dog the attention it wants from you. Walking can alleviate your blood pressure and at the same time alleviate Fido's extra energy. And the social interaction for both of you during walks is priceless.

During the summer, all you need to do is go on a brisk 30-minute walk with your dog in the early morning and/or evening. Take water along for both of you on those extra long walks. And always give yourselves fresh water upon your return home.

Oh, and don't forget that just petting your dog can be calming for both of you. Now, go get that leash and start moving!

Our Westies didn't seem to mind the heat at our annual picnic. They were too busy making new Westie pals, barking at a passing dog, running through a tunnel, or splashing in the wading pool. Thirty-one Westies and their families enjoyed the afternoon at the home of Club President, Bev Walker. Following the Club meeting, everyone enjoyed a delicious potluck, met old friends and made new friends. Congratulations to Angela Evans for winning the Club 50/50 raffle. Westie Jack Kelley, owned by Matt & Cathy, won the Doggie Door Prize.
